Portfolio
pmtee.github.io

Location
Midrand, Gauteng

## TECHNICAL SKILLS

**Cloud & Infra**
AWS · VMware vCenter · Docker · Kubernetes

**Programming**
Python · C# · Java · JavaScript · SQL

**AI & ML**
Scikit-learn · Pandas · NumPy · GenAI

**Security**
HPE Aruba · SD-WAN · SIEM · Linux

**DevOps**
Git/GitHub · Veeam · Grafana · CI/CD

## LANGUAGES

**Sepedi**
Native

**English**
Fluent

**Zulu**
Conversational

**Ndebele**
Conversational

## PROFESSIONAL SUMMARY

BSc Computer Sciences graduate (2024) currently working as Graduate Trainee at Datacentrix. Hands-on experience in enterprise data centre infrastructure, virtualisation, cloud, and network operations. Actively building Python data science, ML, and DevSecOps skills through a structured 6-month self-learning programme documented publicly on GitHub. Holder of 10 industry certifications including AWS, Google, HPE Aruba, and WeThinkCode_ GenAI.

## EXPERIENCE

### Datacentrix
Jul 2025 — Present

Graduate Trainee — IT Infrastructure
Midrand, Gauteng · On-site

→ Deploy and manage VMware vCenter and ESXi VMs in a live enterprise data centre
→ Configure HPE Aruba SD-WAN, SSE, and network switching infrastructure
→ Administer Veeam Backup and Replication; manage iSCSI and Fibre Channel storage
→ Log and resolve incidents via Ivanti HEAT following ITIL processes and SLA targets
→ Monitor infrastructure with Grafana and LibreNMS; build Python automation tools
→ Complete WeThinkCode_ GenAI courses and implement AI in daily engineering practice

### THT Electrical Technologies
Jan 2024 — Jul 2024

Administrative Assistant — Part-time
Limpopo · On-site

→ Coordinated client quotes, job scheduling, and marketing campaigns
→ Maintained accurate client and invoice records; managed vehicle fleet

## EDUCATION

### IIE Varsity College Waterfall
2020 — 2024

BSc Computer Sciences — Application Development

Modules: Java, Kotlin, C#, Python, Cloud Development, Advanced Databases, RESTful APIs, Network Engineering, Application Security, DevOps.

**Capstone:** Secure RESTful microservices deployed with Docker and Kubernetes.

## CERTIFICATIONS

- **WeThinkCode_ GenAI — Software Engineer**
  Apr 2026
- **WeThinkCode_ GenAI — Professionals**
  Apr 2026
- **AWS Certified Solutions Architect**
  2025
- **Google IT Support Professional**
  2025
- **Google Cybersecurity Professional**
  2025
- **HPE ATP — Hybrid Cloud**
  Feb 2026
- **HPE Aruba Networking Specialist (SSE)**
  2026
- **Aruba Accredited SD-WAN Professional**
  2026
- **TryHackMe Pre-Security**
  Feb 2026
- **IT Varsity Full Stack Developer**
  2025

## KEY PROJECTS

### InfraWatch
Python · psutil · Pandas · VMware

Real-time VM monitoring tool — CPU, RAM, disk, network metrics with alerting. Built on Datacentrix lab servers.

### Titanic ML Predictor
Python · Scikit-learn · Random Forest

82.7% accuracy classifier trained on 891 real records. Discovered historical survival patterns autonomously.

### Titanic EDA
Python · Pandas · Matplotlib · Seaborn

Full exploratory data analysis — missing value treatment, feature engineering, 5 professional visualisations.

# PHETHO
# TLAKA

Graduate IT Engineer

## DATA ANALYTICS SKILLS

**Python**
Advanced — Pandas, NumPy, Matplotlib

**Machine Learning**
Scikit-learn, Random Forest, 82.7% acc

**Data Cleaning**
Missing values, feature engineering

**Visualisation**
Matplotlib, Seaborn, Plotly

**SQL**
SQLite, PostgreSQL, window functions

**Power BI**
Dashboards, DAX, Power Query

**Statistics**
EDA, distributions, correlation

**GenAI**
WeThinkCode_ certified (x2)

# DATA ANALYTICS

Focus, Projects & Insights

### Titanic Survival Analysis

- → 891 real passenger records loaded and cleaned
- → 177 missing Age values filled using median imputation
- → 74.2% female survival vs 18.9% male — data confirms women-first policy
- → 1st class: 63% survival · 2nd class: 47% · 3rd class: 24%
- → Children had highest survival rate across all age groups

### ML Model Performance

- → Random Forest Classifier — 100 decision trees
- → 712 passengers for training · 179 for honest testing
- → 82.7% accuracy on data the model had never seen
- → Top feature: Fare (0.270) — wealth was the biggest predictor
- → Precision 84% on Died · Recall 76% on Survived

### Infrastructure Analytics — InfraWatch

- → 720 real server metric readings (30 days × 24 hours)
- → Mean CPU: 59.8% · Peak: 100% · Std deviation: 14.7
- → Only 2.4% of hours exceeded 90% CPU threshold
- → Alert system: GREEN / AMBER / RED threshold logic in Python
- → Data pipeline: collect → clean → analyse → CSV → Power BI

**Tools & Technologies Used in Data Projects:**

Python 3.11 | Pandas 2.2 | NumPy 1.26 | Matplotlib | Seaborn | Scikit-learn | Plotly Dash | Jupyter Lab | SQL / SQLite | PostgreSQL (AWS RDS) | Power BI Service
