PROFESSIONAL SUMMARY

Computer Sciences graduate (2024) with active hands-on experience at Datacentrix in enterprise infrastructure, virtualisation, and technical support. Skilled in troubleshooting complex environments, managing ITSM workflows, and communicating clearly with clients. Proficient across Microsoft technologies, RESTful APIs, cloud platforms, and database management. Building Python data science, machine learning, and DevSecOps skills through a structured self-learning programme documented publicly on GitHub. Holder of 10 industry certifications.

EXPERIENCE

IT Infrastructure Intern July 2025 – Present

Datacentrix Midrand, Gauteng

- Perform rack and stack of servers, storage arrays, and switches; handle structured cabling, port labelling, and cable documentation in a live data centre environment.
- Deploy, configure, and secure virtual machines on VMware vCenter and ESXi; execute VM migrations between hosts and manage snapshots and Veeam backups.
- Work with iSCSI and Fibre Channel storage protocols; support SAN and NAS device configuration and connectivity.
- Log and resolve incidents via Ivanti HEAT following ITIL-aligned SLA targets; conduct network diagnostics, break-fix on switches and servers, and infrastructure monitoring using Grafana and LibreNMS.
- Support HPE Aruba SDWAN and Security Service Edge (SSE) deployments; contribute to knowledge base documentation and internal runbooks.
- Engage directly with clients and stakeholders to communicate findings, gather requirements, and deliver clear status updates.
- Build Python automation tools including InfraWatch; complete WeThinkCode_ GenAI courses and implement AI concepts in daily engineering practice.

Part-Time Administrative Assistant January 2024 – June 2024

THT Electrical Technologies Limpopo, South Africa

- Coordinated client quotes, job scheduling, invoicing, and marketing campaigns while maintaining professional client communication.
- Supported office operations, car fleet management, and business support systems in an electrical services environment.

EDUCATION

Bachelor of Computer Sciences – Application Development Completed December 2024

IIE Varsity College Waterfall

- Key modules: Java, Kotlin, C#, Python, Cloud Development, Advanced Databases, RESTful API Integration, Network Engineering, Application Security.
- Capstone project: Designed and deployed secure RESTful microservices using Docker and Kubernetes with role-based access control.

Grade 12 National Senior Certificate 2020

Groblersdal Academy

CERTIFICATIONS

WeThinkCode_ GenAI for Software Engineers (Apr 2026) · WeThinkCode_ GenAI for Professionals (Apr 2026) · AWS Certified Solutions Architect – Associate

Google IT Support Professional · Google Cybersecurity Professional · HPE ATP – Hybrid Cloud (Feb 2026) · HPE Aruba Networking Specialist (SSE)

Aruba Accredited SDWAN Professional · TryHackMe Pre-Security (Feb 2026) · IT Varsity Full Stack Developer

TECHNICAL SKILLS

Programming & Web	Java, Kotlin, C#, Python, C++, JavaScript, HTML, CSS, PHP, RESTful APIs, .NET
Databases	MySQL, MongoDB, MariaDB, Firebase, NoSQL; SQL stored procedures, database design
Microsoft & Cloud	Active Directory, IIS, Visual Studio, SharePoint; AWS, Docker, Kubernetes, hybrid cloud
Virtualisation & Backup	VMware vCenter, ESXi; VM migrations, snapshots; Veeam Backup and Replication
Infrastructure & Storage	Rack and stack; structured cabling; iSCSI, Fibre Channel; SAN/NAS; server and switch break-fix
Networking & Monitoring	Grafana, LibreNMS, OpenNMS, Linux/Unix; packet capture, diagnostics, SDWAN, SSE
ITSM & Support	Ivanti HEAT; SLA management; ITIL awareness; knowledge base documentation; client communication
Security	Application security, cybersecurity fundamentals, endpoint hardening, secure microservices
Data & AI	Pandas, NumPy, Matplotlib, Scikit-learn, Power BI, Jupyter Lab, GenAI (WeThinkCode_ certified x2)

KEY PROJECTS

InfraWatch — Infrastructure Monitoring Tool github.com/pmtree/phetho-lab

[Python](#) · [psutil](#) · [Pandas](#) · [VMware vCenter](#) · [Ubuntu 22.04](#)

Real-time infrastructure monitoring tool that collects CPU, RAM, disk, and network metrics from enterprise servers every minute. Built and tested on live VMware vCenter lab servers at Datacentrix. Saves data to CSV, analyses trends with Pandas, and triggers GREEN / AMBER / RED threshold alerts. Full pipeline: collect, clean, analyse, visualise, export to Power BI.

Titanic Data Analysis — Exploratory Data Analysis github.com/pmtree/phetho-lab

[Python](#) · [Pandas](#) · [Matplotlib](#) · [Seaborn](#) · [NumPy](#) · [Jupyter Lab](#)

Full exploratory data analysis on 891 real Titanic passenger records. Cleaned missing data: 177 missing Age values filled with median; Cabin column dropped (77% nulls). Five professional visualisations: 74.2% female vs 18.9% male survival; 1st class 63% vs 3rd class 24% survival. Used Pandas groupby, filtering, and pivot tables throughout.

Finance Tracker — Command-Line Application github.com/pmtree/phetho-lab

[Python](#) · [JSON](#) · [File I/O](#) · [CLI](#)

Command-line personal finance tracker. Add income and expenses with categories, view spending breakdowns, and track patterns over time. Data persists between sessions using JSON file storage. Demonstrates Python functions, dictionaries, loops, conditionals, and file I/O.
