PROFESSIONAL SUMMARY

Computer Sciences graduate (BSc Application Development, IIE Varsity College 2024) with hands-on experience at Datacentrix in enterprise infrastructure, virtualisation, and technical support. I deploy and manage VMware vCenter environments, HPE Aruba SD-WAN, and Veeam daily while building production-grade software: a C# .NET 8 REST API with repository pattern and 6 xUnit tests, and a machine learning pipeline at 82.7% accuracy deployed on Kubernetes via GitHub Actions CI/CD. Holder of 10 industry certifications spanning cloud, cybersecurity, networking, and AI. I build systems that are automated, observable, and reliable.

EXPERIENCE

IT Infrastructure Intern

July 2025 – Present

Datacentrix Midrand, Gauteng

- Perform rack and stack of servers, storage arrays, and switches; handle structured cabling, port labelling, and cable documentation in a live enterprise data centre.
- Deploy, configure, and secure virtual machines on VMware vCenter and ESXi; execute VM migrations between hosts and manage snapshots and Veeam Backup & Replication workflows.
- Work with iSCSI and Fibre Channel storage protocols; support SAN and NAS device configuration and multi-path connectivity.
- Log and resolve incidents via Ivanti HEAT following ITIL-aligned SLA targets; conduct network diagnostics and break-fix on enterprise switches and servers.
- Support HPE Aruba SD-WAN and Security Service Edge (SSE) deployments; build Python automation tools and C# REST APIs; author knowledge base documentation and internal runbooks.
- Complete WeThinkCode_ GenAI for Software Engineers and GenAI for Professionals; apply generative AI concepts in daily engineering practice.

Part-Time Administrative Assistant

January 2024 – June 2024

THT Electrical Technologies Limpopo, South Africa

- Coordinated client quotes, job scheduling, invoicing, and marketing campaigns while maintaining professional stakeholder communication.
- Supported office operations, vehicle fleet management, and business support systems in a fast-paced electrical services environment.

EDUCATION

Bachelor of Computer Sciences – Application Development

Completed December 2024

IIE Varsity College Waterfall, KwaZulu-Natal

- Key modules: Java, Kotlin, C#, Python, Cloud Development, Advanced Databases, RESTful API Integration, Network Engineering, Application Security.
- Capstone project: Designed and deployed secure RESTful microservices with Docker, Kubernetes, and role-based access control — graded distinction.

Grade 12 National Senior Certificate

2020

Groblersdal Academy

KEY PROJECTS

ProcessTracker — C# .NET 8 REST API github.com/pmtee/NintexProcessTracker
C# · .NET 8 Minimal API · Entity Framework Core · SQLite · xUnit · Swagger · Dependency Injection

- Full-stack C# REST API for business process lifecycle management (PENDING → IN_PROGRESS → COMPLETED → FAILED); implements IProcessRepository interface + ProcessRepository — demonstrating SOLID principles and dependency injection.
- 6 xUnit integration tests with in-memory database (0 failures); Swagger/OpenAPI auto-documentation; CORS-enabled; live HTML/CSS/JS dashboard served directly from the API.

Titanic ML API — Machine Learning Pipeline github.com/pmtee/phetho-lab
Python · Scikit-learn · FastAPI · Docker · Kubernetes · GitHub Actions · Prometheus

- End-to-end ML pipeline: data cleaning, feature engineering, Random Forest at 82.7% accuracy; served as FastAPI REST API, containerised with Docker, deployed on Kubernetes with 2 self-healing pods.
- GitHub Actions CI/CD: 7 pytest tests → Docker build → Docker Hub push in 1m 53s on every push to main. Prometheus metrics endpoint tracking request count, latency, and predictions.

InfraWatch — Infrastructure Monitoring Tool github.com/pmtee/phetho-lab
Python · psutil · Pandas · Matplotlib · CSV · Ubuntu 22.04

- Real-time server monitoring collecting CPU, RAM, disk, and network metrics every 60 seconds; Pandas trend analysis; GREEN / AMBER / RED threshold alerts; export pipeline to Power BI dashboards.

Titanic EDA — Exploratory Data Analysis github.com/pmtee/phetho-lab
Python · Pandas · Matplotlib · Seaborn · NumPy · Jupyter Lab

- Full EDA on 891 real records; five professional visualisations; key findings: 74.2% female vs 18.9% male survival; 1st class 63% vs 3rd class 24% — Pandas groupby, pivot tables, stacked bar charts.

TECHNICAL SKILLS

Programming	Java, Kotlin, C# (.NET 8), Python, C++, JavaScript, HTML, CSS, PHP, RESTful APIs
Testing & APIs	xUnit, pytest, Swagger/OpenAPI, FastAPI, ASP.NET Core Minimal API, Postman
Databases	MySQL, PostgreSQL, SQLite (EF Core), MongoDB, MariaDB, Firebase; SQL stored procedures
Cloud & DevOps	AWS SAA, Docker, Kubernetes, GitHub Actions, VMware vCenter/ESXi, Veeam B&R
Infrastructure	Rack and stack; iSCSI, Fibre Channel; SAN/NAS; HPE Aruba SD-WAN/SSE; ITIL; Ivanti HEAT
Data & AI	Pandas, NumPy, Matplotlib, Scikit-learn, Power BI, Jupyter Lab; GenAI certified x2

CERTIFICATIONS

WeThinkCode_ GenAI for Software Engineers (Apr 2026) · WeThinkCode_ GenAI for Professionals (Apr 2026) · AWS Certified Solutions Architect – Associate · Google IT Support Professional · Google Cybersecurity Professional · HPE ATP – Hybrid Cloud (Feb 2026) · HPE Aruba Networking Specialist SSE · Aruba SD-WAN Professional · TryHackMe Pre-Security (Feb 2026) · IT Varsity Full Stack Developer
